PROFILE

A Civil Engineering graduate with strong web development skills, combining engineering principles with modern software solutions. Experienced in building and maintaining web applications to support data management, project coordination, and process automation. Passionate about leveraging technology to improve efficiency, transparency, and innovation within engineering and infrastructure-related environments.

SKILLS AND OBJECTIVES

- Client Relations & Management
- Ability to read and understand structural drawings
- Skills on concrete works and its workability
- Time Management
- Full-Stack Development (React, [Node.js](#), JavaScript, Firebase)
- Experience in project management

EXPERIENCE

Perfect Fountain Construction Company | Civil Engineering Intern

June 2018 - November 2018

Project: Construction of different residential building at different locations in Lagos State

- Assisted in liaising with clients, subcontractors, local authority.
- Helped in ensuring project packages meet agreed specifications, budgets and/or timescales.
- Provided support in drawing up work schedules and communicating any adjustments to crew members and clients.
- Supervised the site labor workforce.

Hi-tech Construction Company | Civil Engineering Intern

March 2019 - April 2020

Project: Construction of the Three Way Overhead Bridge

Location: Pen-Cinema, Agege Lagos State

Client: Lagos State Ministry of Works Alausa Secretariat

- Assisted in site supervision and daily monitoring of construction activities on the Pen-Cinema Overhead Bridge project.

- Participated in structural works including foundations, reinforcement placement, formwork, and concreting.
- Worked collaboratively with site engineers, foremen, and technicians to ensure smooth project execution.
- Gained hands-on experience in bridge construction processes, site coordination, and health & safety practices.
- Monitored material usage and ensured compliance with quality and safety standards on site.

Lead Super Store | Assistant Inventory Officer**January 2024 – December 2024**

- Supported inventory tracking, stock control, and warehouse documentation.
- Assisted in receiving, inspection, storage, and issuance of materials.
- Participated in stock counts, audits, and reporting activities.
- Assisted in organizing the warehouse to improve accessibility and efficiency.
- Updated stock levels regularly to reflect warehouse movements.
- Assisted in enforcing warehouse safety procedures and proper handling of materials.

Full-Stack Web Developer | Freelance / Self-Employed**May 2025 - Present**

- Developed and maintained full-stack web applications.
- Design and implement responsive front-end applications using React, HTML, CSS, and JavaScript.
- Develop backend services, APIs, and databases with Node.js, Express, and MongoDB.
- Integrate third-party APIs and maintain secure, scalable web applications.
- Write automated tests and debug issues across the frontend, backend, and database.
- Deploy applications to cloud platforms and monitor production performance.
- Ensure seamless integration between frontend and backend systems.

EDUCATION

Lagos State Polytechnic | Civil Engineering (Upper Credit)

2022

Federal Polytechnic Ilaro | Civil Engineering (Upper Credit)

2019

Dream Makers International College

2014

CERTIFICATION

Software Engineer

2025
